schlaver@comcast.net

I'm searching for my next opportunity to leverage my proven and successful Agile Leader & Software Engineer Lead experience within an exciting and growing organization.

COMPETENCIES

- IT Leader with years of success in planning, monitoring, and driving the on-time and within budget delivery of complex technology, business, and process improvement solutions.
- Chosen by leadership to assume responsibility and lead the successful transition to agile methodologies, resulting in a 30% faster delivery of business value.
- Focused the team on “value, not volume” by collaborating with various stakeholders to articulate business need.
- Career includes high-profile position at Comcast and Truven Health Analytics leading the development and delivery of technical solutions.
- Demonstrated strength in introducing and leading the adoption of standards and best practices across the entire project life cycle that have enhanced the alignment of technology investments with business and regulatory requirements.
- Skilled in building, training, and mentoring high-performing teams in consistently delivering strategic software projects.
- I led the offshore team in the creation of a mobile version of the new Micromedex 2.0 product.
- Effective at managing cross-functional teams, solving complex problems, and delivering new technologies and consumer experiences.

EDUCATION

Bachelors of Science in Computer Science - Wright State University

CERTIFICATIONS

Certified Scrum Master

ICAgile Certified Professional in Agile Coaching

WORK EXPERIENCE

Comcast

08/2013 – present

Scrum Master

Denver, CO

I am striving to create a culture of continuous improvement in which employees take ownership of problems and work together to bring about solutions. Coaching teams how to be agile while creating a safe and collaborative environment for the teams to foster creativity and innovation, and build cohesive and productive teams. Proven ability to partner with clients, identify priorities, contribute to strategic and tactical planning, and build business and technical plans to meet business requirements.

- Introduced and championed Agile methodologies resulting in a 30% faster delivery of business value.
- Facilitated training on Agile methodologies including Product Owner and Scrum Master training.
- Transitioned two development teams from Waterfall project management to Scrum framework.
- Focused the team on “value, not volume” by collaborating with various stakeholders to articulate business needs.
- Empowered teams to reduced task-switching, increase test coverage, automate, and eliminate redundancies, which reduced self-inflicted defects and rework.
- Coaching teams on Agile best practices for effective and value-based software delivery.

Truven Health Analytics

02/2002 – 08/2012

Sr. Software Engineer, Team Lead

Greenwood Village, CO

Team Lead, and Senior Software Engineer for Micromedex 2.0, a Single Solution for powerful Clinical Decision Support, Micromedex Clinical Knowledge Suite. This flagship product gets over a million transactions per day worldwide 24/7.

- Scrum Master of the Micromedex 2.0 team.
- Team Lead of a 7 member team for development and maintenance of the user interface for the internet web application known as Micromedex 2.0
- Led the support of multiple browsers including mobile iOS and Android devices.
- Changed the rendering of web pages to dynamic loading, resulting in a 75% increase in page rendering.
